Sustainability

At Warrell Richards, we are passionate about reducing our carbon footprint, this is one reason we choose to design and build metal toolboxes over the plastic alternative.

Metal is a material that is endlessly recyclable –

for example, Aluminium drinks cans can be on sale as another can in just 60 days, It's crucial we each play our own part in making sustainable choices and recycle our waste metal.

How does plastic harm the environment?

Plastic stays around an extremely long time, threatening wildlife and spreading toxins, Plastic also contributes to global warming Almost all plastics are made from chemicals that come from the production of planet-warming fuels (gas, oil and even coal). Our reliance on plastic prolongs our demand for these dirty fuels, burning plastics in incinerators also releases climate-wrecking gases and toxic air pollution

To further our carbon footprint, we only use reclaimed / repurposed pallets. Our used pallets come from the recycling sector and the circular economy. used pallets are repaired by replacing broken parts with either new or reusable parts. Used pallets that no longer meet the quality requirements are crushed and follow the energy recycling process.

We use FSC approved Enviro cardboard boxes to package your items – protecting your goods & the planet –

Why use FSC certified cardboard?

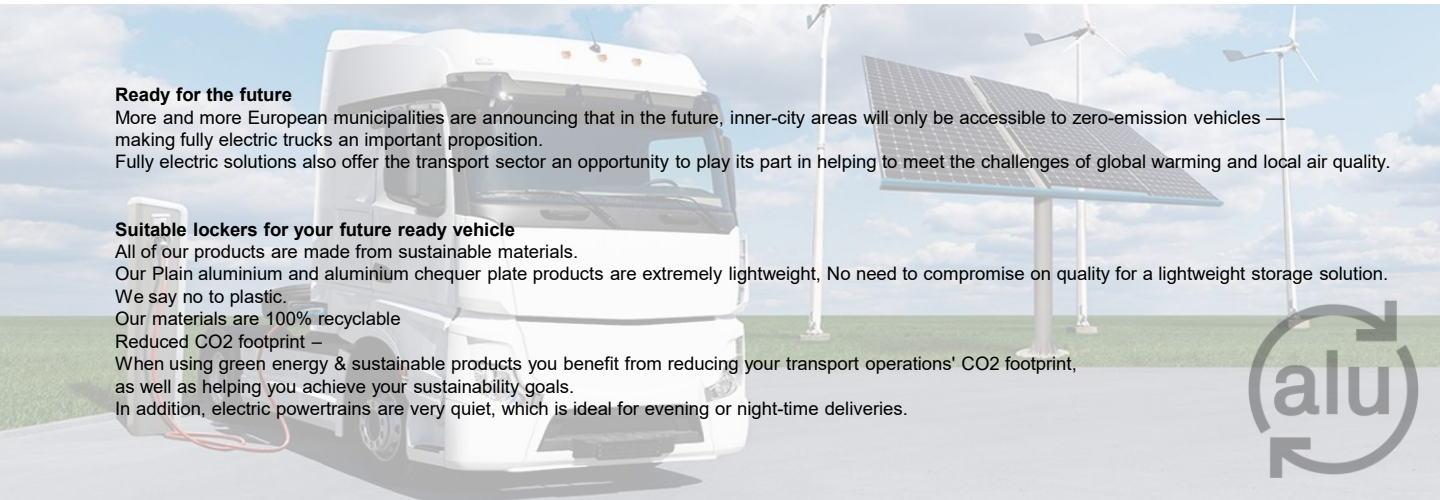

Carbon benefits - Trees absorb CO₂ as they grow Every cubic meter of wood used as substitute for other materials displaces an average of 1.1 tons CO₂. If this is added to the 0.9 tons of CO₂ stored, then each cubic meter of wood can save a total of 2 tons of CO₂

Ready for the future

More and more European municipalities are announcing that in the future, inner-city areas will only be accessible to zero-emission vehicles — making fully electric trucks an important proposition. Fully electric solutions also offer the transport sector an opportunity to play its part in helping to meet the challenges of global warming and local air quality.

Suitable lockers for your future ready vehicle

All of our products are made from sustainable materials. Our Plain aluminium and aluminium chequer plate products are extremely lightweight, No need to compromise on quality for a lightweight storage solution. We say no to plastic. Our materials are 100% recyclable Reduced CO₂ footprint – When using green energy & sustainable products you benefit from reducing your transport operations' CO₂ footprint, as well as helping you achieve your sustainability goals. In addition, electric powertrains are very quiet, which is ideal for evening or night-time deliveries.

L X H X D

Length – Side to side

Height – Top to bottom

Depth – Front to back

Dimensions are in millimetres

55mm Lip / Double fold around the aperture of the locker, with rubber seal attached
Increases strength and durability
Decreases aperture by 110mm total in length and height
but still having the ability to use the space inside
This also acts as a rain soakaway drainage system

The door makes up 60mm of the measurement (Included in the total measurement)
Still able to use the 60mm of space behind the door

When open the door overhang requires 30mm of clearance

Need the door to sit flat? If for any reason you need your doors to open level, Simply discuss this with the sales team prior to purchase

Aluminium Chequerplate / Treadplate / 5 Bar

The benefits of this versatile material are numerous, including:

Slip resistant – Raised pattern provides traction on steps, ramps, ladders, floors, tailgates, running boards, catwalks, loading docks, etc....

Corrosion resistant – Made of corrosion resistant metals, provides years of service even under the toughest conditions, including marine locations

Hygienic – Easy to wash down and is able to resist damage from strong, corrosive cleaning agents.

Protective – Prevents damage to walls, doors, corners, skids etc... Also protects bumpers, treads, truck beds, tailgates, bodies of commercial vehicles, off road, and other vehicles

Lightweight material

Decorative - Having a heavily raised 5-bar pattern, Its both functional and decorative and is commonly used in vehicle construction.

Can be painted / powder coated or left in its natural state

Plain Aluminium – 5251 Grade

Medium strength

High corrosion resistance particularly in marine environments

Lightweight material

Can be painted / powder coated or left in its natural state

5251 is typically used on:

Boats, Paneling and pressings, Marine structures, Aircraft parts, Vehicle panels, Furniture tubing, Silos and Containers

Stainless

304 Grade – High grade

High strength

Excellent corrosion resistance

Durable

Hygiene - The hard metallic surface makes it difficult for bacteria to adhere and survive.

Its easy clean ability makes it the first choice for strict hygiene conditions.

Recyclable - Stainless steel is 100% recyclable. In fact, 50% of new stainless steel comes from old remelted stainless steel scrap, thereby completing the full life cycle.

Longevity - When the total life cycle costs are considered, stainless is often the least expensive material option.

Mirrored Stainless

Mirror finish has been finely polished into a mirror, unlike the bright annealed mirror finish that has been acid dipped leaving a murky mirror effect) – Beautiful finish
Most commonly used to make mirrors and reflective items

Polished Stainless

Has a satin like finish, The most commonly used stainless for the austenitic look and finish

Circled / Flowered Stainless

Also known as flowered stainless, Easy to maintain, reflective surface, highly decorative and eye-catching finish

Chassis Lockers

Can be manufactured in any of our materials:

- Plain Aluminium - 5251 grade
- Polished Stainless
- Polished stainless with mirrored stainless doors

SIZE: As per chart below

Can be custom made to any size

Door opens to the side – can be right or left hand hinged

SHELF – Removable when not needed

Chequerplate top options x3

-No chequer plate top

-Extended chequer plate top to meet the catwalk

-Standard chequer top

x1 Vector T2 handle lock with keys

Concealed hinges

Durable, Strong, lightweight (Aluminium version)

Removable doors

Waterproof

Sustainable, Recyclable

Can be powder coated to protect against the elements (Optional)

Can be custom made to any size

Door is on the top and slants down towards the front

Recess allows the door to open flat so the locker can be pushed right up against walls/beds/sides (Optional)

Gas struts on the door to keep it open when in use

X2 vector locks with keys

Concealed hinges, Durable, Strong, lightweight, Removable doors, Waterproof, Sustainable, Recyclable

Can be powder coated to protect against the elements (Optional)

Usually when open, our door overhang requires a 30mm clearance

But with this locker we have added a recess to allow the door to sit flat/open level with the body of the box
(This is optional)
